Saudi Coffee Growing Regions

Qasa scientific library - demo reference file

Where Saudi Arabica coffee is grown

- Jazan: the mountain terraces of the south-west, home of the Khawlani heritage coffee.
- Asir: highland farms on terraced slopes.
- Al Baha: smaller highland plots in the Sarawat mountains.

Growing conditions

- Terraced mountain slopes, mostly above 1,000 metres.
- Coffee grown under shade alongside other crops; harvest by hand.
- Natural (dried in the cherry) processing is the traditional method.

This file is sample material for testing the library; the association replaces it with its own reference.
